

## Investment Strategy and Objective

The **ansa - global Q absolute alpha fund** is the absolute return concept of ansa capital management (ansa) which provides persistent low to zero correlation to traditional markets, as well as conventional Global Macro and Managed Futures/CTA approaches. The investment objective is to achieve superior risk-adjusted returns and an asymmetric pay-off profile. Theoretical maximum loss is limited to 10% p.a. while profit potential is open-ended. The expected return of the fund is 12-15% p.a. with a volatility target at a similar level. These goals are pursued by diversifying across time horizon and signal generation levels. We thoroughly combine investment strategies based on latest academic research and apply quantitative models as well as systematic risk and money management techniques. Active positions are carefully chosen from our short-term factor timing approach and embedded within our proprietary risk-first framework which makes the fund even more uncorrelated to our peers. The fund invests globally in equity indices, interest rates, currencies and commodities via liquid futures and other derivative products. The investment universe

\*DM = Developed Markets, EM = Emerging Markets

## Investment Manager

ansa was founded in 2013 by Dr. Andreas Sauer, the former CEO and CIO of Quoniam Asset Management. The highly skilled and specialized team of 8 investment professionals is based in offices in Bensheim and Frankfurt. With 70+ years of in-depth experience in the financial industry it has managed money in quantitative strategies successfully through multiple market cycles. ansa focuses exclusively on systematic global macro strategies that are efficiently implemented in the cross-asset space. The internationally acknowledged capability of designing and applying rigorous investment processes with utmost care, uniquely positions ansa to achieve attractive absolute returns for its investors.
